

# SSW Onset-Aligned Mechanism Chain (Composite across 16 events)

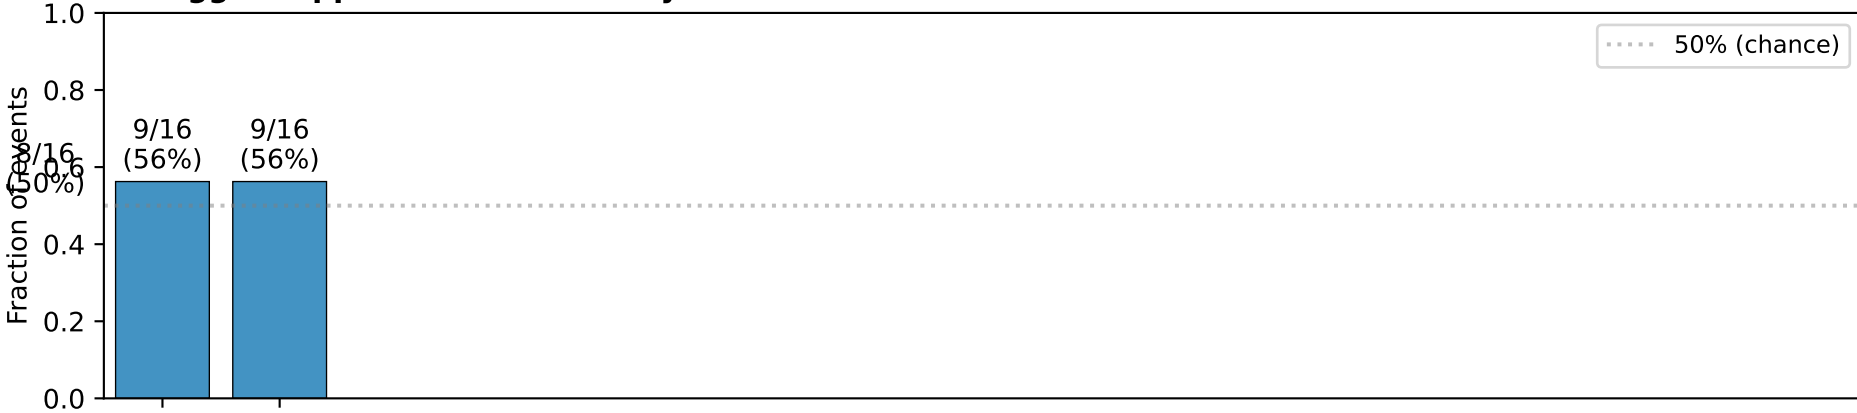

**A Z500 predicts avalanche response ( $r = 0.56$ ,  $P = 0.025$ )**

**B Stratospheric temperature does NOT predict response ( $r = -0.11$ ,  $P = 0.683$ )**

**C Trigger suppression consistency across 16 events**

**D Threshold amplification: modest weather shift → large hazard response**
