a
the imposed SSW moves the distribution across the class threshold
no SSW (control)
SSW imposed (nudged)
DW
NDW
variance ratio
0.96 [0.87, 1.05]
density
surface NAM proxy, days 8-25 (σ of control)
b
the DW rate responds in all 36 pairs
84%
45%
share of members classified DW
open: 11 of 36 pairs where the SSW-imposed ensemble has
< 3 NDW members (DW share 0.96–1.00), so no contrast exists
no SSW
SSW imposed
c
the class contrast does not
25 of 36 pairs, 8 models
dotted: one Gaussian
cut at zero
DW − NDW contrast, SSW imposed (σ)
DW − NDW contrast, no SSW (σ)
d
what the forcing changes, in one unit
−1.36σ
mean NAM
(9 models)
