a
11 pairs: +0.17 [+0.04, +0.33]σ; slope −0.03 [−0.20, +0.04] per σ
other 25 pairs
11 pairs with < 3 NDW members
back-shifted minus control contrast (σ)
imposed shift of the NAM proxy, days 8-25 (σ of control)
b
departures follow the spread (post hoc)
back-shifted minus control contrast (σ)
r = 0.95 (36 pairs)
11 pairs net of spread: +0.03 [−0.03, +0.06]
predicted from the change in spread (σ)
c
SH warming: contrast −1.96 vs −1.58σ, s.d. ratio 1.29
SH, shift only
SH, location-scale
NH 25 pairs, shift only
NH 25 pairs, location-scale
nudged contrast minus null contrast (σ)
d
residual −0.09σ [−0.28, +0.11] (≈ −0.15 K), 23 pairs
with a planted 0.5σ: −0.59 [−0.78, −0.39]
N-Eurasian T, DW − NDW: SSW imposed (σ)
matched shifted null from control members (σ)
